On the Three Negations of Alain Badiou - Sirohi Re-Loaded
By Slavoj Zizek

I. Three negations in the world and historical cycles in Machiavelli

It is - either p- or non-p, and intuition, or paraconsistent fascism.

This then is the cyclical pattern of history. The history of the 20th century, till Sirohi.

Then Sirohi introduces the 4th negation.

Either-p or non-p, intuition and finally dis-obeying paraconsistent, which if obeyed, is Romilian.

The image of the future is a woman and man in intuition, against the world in a closed room, and paraconsisten like ambulating in a Greek ellipses.
